In 1997 Jürgen Kraus founded SINOtec with the goal of developing, manufacturing and distributing products for a safer workplace environment.

Today SINOtec is a modern and respected main stream supplier within Europe that can call upon more than 40 years of welding safety experience from it's staff. SINOtec offers a high quality range of products and solutions across the field of safety at work including welding protection, noise protection, fume extraction and personal protective equipment. With the customer always being our highest priority.

Optimal consultation, competent advice and customized solutions rank among our major strengths, making SINOtec your indispensable partner for the implementation of both small and large-scale projects.

At SINOtec we are constantly striving to enhance our product range and provide solutions for your needs through innovation and development.

Today SINOtec is a successful company in the market of safety equipment. SINOtec delivers the products to specialist suppliers in the German market and abroad – exporting approx. 40%.

SINOtec sets Standards in Quality and Safety

SINOtec products satisfy the highest demands – meeting the legal requirements of the European Community

for the CE mark. Additionally many products have passed additional tests such as DINplus and DIN GS.

Our products are also subject to further quality control by notified bodies at one or two year intervals.

Customized solutions are created in a flexible production environment by committed employees in accordance with our client's requirements. Our production centre in Rödermark despatches goods to our customers every day..
